One of the unchangeable laws of nature is that "like shall beget like." Parents who are related by the ties of blood, or who have a consumptive tendency, or other family blood taint are sure to transmit it to their children in the form of Scrofula. Swollen glands, brittle bones, weak eyes, hip disease, pale, waxy complexions, sickly bodies, running sores and ulcers, etc., are the usual manifestations of the disease. Those who have inherited a scrofulous tendency may succeed in holding it in check during young, vigorous life, but after a spell of sickness, or when the system begins to weaken and lose its vitality from other causes the ravages of the trouble will become manifest and sometimes run into Consumption. S. S. S. goes down into the circulation and forces out the scrofulous deposits, kills the germs and completely cures the disease. It changes the quality of the blood by removing all impurities and poisons, and supplying this vital fluid with rich, health-sustaining qualities. S. S. S. is a purely vegetable medicine, and is especially adapted to systems which have been weakened and poorly nourished by scrofulous blood. Literature on Scrofula and any medical advice desired sent free to all who write.
